SCANDIUM INTERNATIONAL MINING ENGAGES JON CHRISTIAN EVENSEN AS STRATEGIC ADVISOR

Reno, Nevada, November 10, 2026 – Scandium International Mining Corp. (TSX-V:SCY and OTCBB: SCYYF) ("Scandium International" or the "Company") is pleased to announce the appointment of Jon Christian ("JC") Evensen as strategic advisor to the Company as it ramps back up activities around the Nyngan Scandium Project. Mr Evensen will work with management and the board on potential strategic transactions, commercial contracts, key personnel hires, capital markets, and maximizing the value of the Company's assets for all stakeholders.

"Global demand growth for scandium is accelerating but only a small amount of scandium production today comes from outside China or Russia. This is the opportunity Scandium International has been waiting for. Assembling an operating team, the capital and the stakeholder alignment such that the permitted Nyngan Scandium Project can realize its potential to be a key part of the resilient supply chain for scandium is one of the most exciting and asymmetric opportunities I see in the global mining sector looking out into 2027 and the years to come," said JC Evensen.

Mr. Evensen brings over 14 years of experience in investment banking and investment management focused on natural resources. He is currently the President of Eucalyptus Resources, an investing and advisory firm he founded in 2022 after several years working in capital markets in New York focused on metals & mining. He served on the board of PMET Resources (then named Patriot Battery Metals) from April 2022 until January 2023, during which time the share price appreciated by over 700%. Mr. Evensen is currently a director of both Pallas Resources, a private mineral explorer focused on Kazakhstan, and REEcycle, a private rare earth magnet recycling company.

"Scandium International is coming out of a self-imposed hibernation period minimizing cash expenditure to preserve the value of its assets for its existing shareholders. JC brings a diverse range of experiences and relationships in the mining sector that the Company will leverage as the Nyngan Scandium Project advances to be a part of the dynamic evolving western supply chain for this critical mineral," said Mr. Peter Evensen, CEO.

The information in this news release has been reviewed and approved by John Thompson, BE, FAusIMM, Vice-President of Project Development, who is a Qualified Person as that term is defined in National Instrument 43-101.
